EDUCATION

University of British Columbia (UBC)

Sept 2024 to Dec 2027 (expected)

BASc, Computer Engineering (Vancouver, BC)

PROJECTS

Sensum: Wellbeing + Productivity App (Monorepo)

Personal Project

Next.js • TypeScript • Tailwind • Java 17 • Spring Boot • PostgreSQL • MV3 Browser Extension • JWT (HttpOnly)

- Built a 3-part monorepo (Next.js web app + Spring Boot API + MV3 browser extension) to deliver wellbeing nudges and offline “quests” (2 to 10 minutes, 6 categories).
- Implemented secure auth with BCrypt password hashing and an HttpOnly JWT cookie; designed REST APIs (16+ endpoints) backed by PostgreSQL.
- Designed the core loop: recommend 3 quests, complete/skip/snooze actions, XP/leveling, and daily streak tracking; extension batches telemetry events for efficient ingestion.

Fitness Tracker: Desktop Nutrition Tracker

Personal Project

Java • Swing • JSON

- Built a Java Swing app to add/remove foods, track calories consumed vs. calories burned, and review daily totals.
- Implemented JSON persistence (save/load) to restore tracker records across sessions.
- Added event logging to record key user actions for debugging and traceability.

Canvas Assistant: AI Chatbot

Hackathon

Node.js • Google Dialogflow • Canvas API

- Built a student-support chatbot prototype using Dialogflow; integrated with Canvas-style data flows for real-time responses.
- Focused on rapid iteration, integration points, and user-friendly conversational UX under hackathon time constraints.

Data Science: Player Engagement Analysis

Academic

R • Statistical Modeling • KNN • Regression

- Analyzed engagement patterns and built predictive models to support capacity/resource planning decisions.
- Applied KNN and regression approaches and summarized findings through exploratory analysis.

EXPERIENCE

Frontend Developer (MOps) (UBC ORBIT Satellite Design Team)

Jan 2026 to Present

Vancouver, BC

- Building operator-facing tooling and dashboards using React / Next.js.
- Working with team APIs and end-to-end (E2E) testing to improve reliability and catch regressions.

Math Tutor (Self-Employed)

Jan 2025 to Present

Surrey, BC

- Tutored high school students in Algebra, Geometry, and Pre-Calculus with adaptive explanations and practice plans.
- Strengthened communication by explaining complex topics clearly and tracking progress over time.

Customer Service Associate (Save-On-Foods)

Mar 2022 to Dec 2023

New Westminster, BC

- Collected customer feedback and reported trends to management to improve service and store operations.

SKILLS

Languages: Java, TypeScript, JavaScript, SQL, C++, R

Backend: Spring Boot, REST APIs, Auth (JWT), PostgreSQL

Frontend: React / Next.js, Tailwind CSS

Tools: Git/GitHub, VS Code
